DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 12/27/05 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent 6,915,780 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

2. Claims 1-4 are allowed.

3. The following is an examiner's statement of reasons for allowance: The references of the Prior Art of Record fail to teach or suggest either alone or in obvious combination the limitations as set forth in claim 1, and specifically comprising the limitation of a signal converting circuit for converting a charge signal from a sensor by an effect of a detecting target and by a converted signal into a voltage signal; and *an automatic correction circuit including an amplifier circuit for detecting a leakage of the charges generated in a signal transmission system by an output level of the signal converting circuit, and including a switch which is actuated by an output of the amplifier circuit, the switch being conducted by an output of the amplifier circuit when the leakage of the charges is detected by the amplifier circuit to discharge an input charge of the signal converting circuit, thereby automatically correcting an output level of said signal converting circuit so that the output levels are the same at the start timing and the end timing for generating the charges of said sensor.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
